About Me

An experienced Software Specialist with expertise in .NET technologies, modern JavaScript libraries, and database design. Skilled at developing modular applications tailored to diverse needs, such as municipal enforcement and smart home systems. A collaborative and solution-focused professional dedicated to delivering high-quality software solutions.

Experience

Software Specialist

04.2021 – 12.2024

BELSİS Computer Software Ltd. Co., BURSA

- Belsis Mobil Zabita Application; A modular application designed to meet the needs of municipal enforcement officers (Marketplace, Advertisement, Penalty). During the project development phase, .Net 5.0, MS SQL, Angular, and Ionic technologies were actively used.
- Belsis Akıllı Merkez Application; A modular application tailored to the needs of municipalities (Rent, Real Estate, Property, Occupation, Registry, Personnel, Salary). The project development involved active use of Entity Framework, .Net Core 5.0, .Net 6.0, React (TypeScript), Kendo UI, DevExpress Reporting, and PostgreSQL technologies. Additionally, I played an active role in database design.

Software Specialist

07.2019 - 09.2020

Teknowin Inc., BURSA

- Teknowin Smart Home Application, An application allowing users to add and remotely control smart devices (Smart Plug, Smart Switch, Thermostat) and create scenarios. Development involved PHP, MySQL, Apache Cordova (JavaScript), and Framework7 UI technologies.
- Teknowin Alarm Application, An application enabling users to add and remotely control various alarm devices (Smoke Sensor, Motion Sensor, Door and Window Sensor), receive notifications, calls, and SMS during sensor triggers, and create scenarios. Development used PHP, MySQL, Apache Cordova (JavaScript), Bootstrap, JQuery, HTML, JavaScript, and CSS technologies. I also played an active role in database design.

Education

Electrical and Electronics Engineering

2010-2019

Sakarya University – Faculty of Technology
